PV5 cargo – Roof bars

Contact a sales representative

Floor

Modul-Floor

Lightweight and robust van floor with anti-slip aluminium tread plate

Standard floor

A tongue-and-groove solution that enables fast, safe and ergonomic installation of the floor modules. The floor's integrated rails (longitudinal) enable, together with wall rails, quick and secure installation of

vehicle racking and fittings.

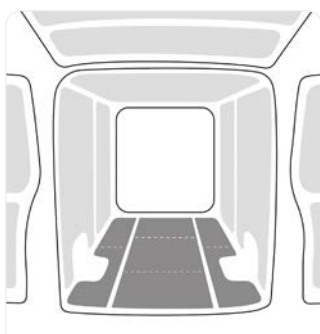

Floor with transverse rails

The floor's integrated rails (longitudinal and transverse) are used for fast and secure installation of vehicle racking and

other accessories. Accessories such as lashing hooks and load bars are easily mounted in the floor rails.

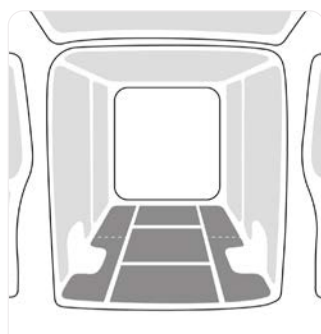

XL floor

The floor's integrated rails (longitudinal) enable, together with wall rails, quick and secure installation of vehicle racking.

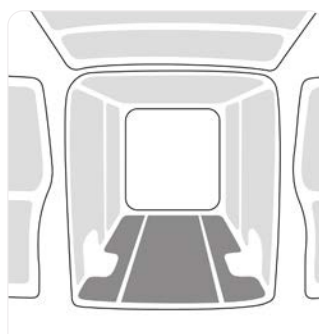

Standard

F0780010000

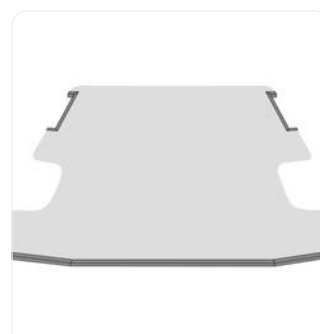

Transverse rails

F1780010000

XL floor

Edging strip - DD

E0780030000

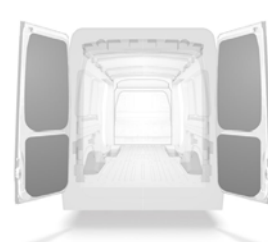

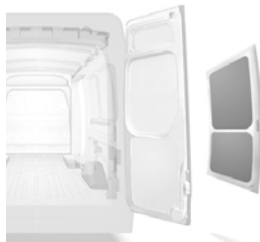

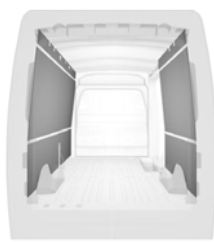

Lining

Protects the vehicle's surfaces

Lining made from lightweight materials that protect the vehicle bodywork and are easy to wipe clean, while contributing to a bright and pleasant working environment.

To optimise weight, the pre-cut lining is designed to fit between the vehicle's structural beams.

Contact a sales representative or visit our website to view linings for the KIA PV5.

Multi-Box – Robust and ergonomic tool and storage box

- Made from impact-resistant material.
- Resistant to most oils, acids, and chemicals.
- Transparent window provides an overview of the contents without opening the lid
- Lid features a rubber-coated handle for optimal ergonomics.
- Extremely robust lid – when mounted on the Multi-Box, it is strong enough to be used as a step stool.

The Multi-Box has its designated spot on a fixed or pull-out shelf in the storage system and can easily be removed and carried away.
